

Drive Line Service keeps bearings and gears free of varnish and deposits

Lubricant breakdown can severely damage critical gear components!

One of our state of the art technicians will use state-of-the-art equipment to:

- ³⁵/₁₇ Quickly and effectively remove old, worn out lubricants from manual transmissions, front and rear differentials, transaxles, and transfer cases.
- ³⁵/₁₇ Install gear oil or additive package that is required for the vehicle application.
- ³⁵/₁₇ Road test your vehicle.

Heavy deposits reduce equipment life.

Benefits of the Drive Line Service include:

- ✓ Thermal stability and long life of lubricants.
- ✓ Optimum drive line efficiency.
- ✓ Improved seal performance.
- ✓ Protection against wear, pitting & corrosion.
- ✓ Extends the life of drive and gear boxes.

This Service should be performed every 2 years or 30,000 miles.
