

Transmission fluid before (left) and after service.

Using a state-of-the-art machine, one of our specially trained technicians will:

Valve body spool with heavy deposit build-up.

Valve body spool after transmission service.

- ³⁵/₁₇ Use a safe and effective cleaner to dissolve and suspend the varnish and gums in the transmission, valve body, torque converter, pan, filter element, transmissions lines, transmission cooler.
- ³⁵/₁₇ Flush entire unit of all old fluid and suspended debris and install new ATF of the proper specification.
- ³⁵/₁₇ Fortify the new fluid with seal conditioners, oxidation inhibitors and friction modifiers.
- ³⁵/₁₇ Road test your vehicle.

Benefits for the transmission service:

- ✓ Eliminates hard shifting, chattering, and slipping.
- ✓ Provides cooler operation.
- ✓ Reconditions seals and extends transmission life.

This Service should be performed every 2 years or 30,000 miles for long, trouble-free transmission life.
